

Simulation Scenario Development Form

Simulation Title:	
Author	
Date developed	
Scenario revision dates:	
Learners roles: (Students, RN, MD, PA)	
Number of learners per scenario	
Development Hours:	
Objectives:	
Simulation Setting: (OR, PACU, Pt room) In Simulation center or Insitu	
Simulator: (3G, Child, Infant, Imbedded participant, SP)	
Storyline: patient history: Includes patient name, age, weight, height, gender, PMHx, current meds, allergies, and current background	
Equipment required: (IV's, ET tubes, Chest tubes)	
Fluids and medications:	
Moulage:	
Paperwork, labs, X rays and EKG's, photos, videos:	
Interventions: (fluid resuscitation, medication administration, airway management, CPR)	
Procedures:	
Evaluation tools and measurement points:	
Advance organizer/pretest and how delivered	
Estimated time to run simulation and debriefing	
Comments:
